

FREEDOM INTERNATIONAL SCHOOL
COMPUTER SCIENCE 2026-27
Text file Worksheet

CS Board 2023 Main Paper

27. (a) Write the definition of a Python function named `LongLines()` which reads the contents of a text file named '`LINES.TXT`' and displays those lines from the file which have at least 10 words in it. For example, if the content of '`LINES.TXT`' is as follows : 3

Once upon a time, there was a woodcutter
He lived in a little house in a beautiful, green wood.
One day, he was merrily chopping some wood.
He saw a little girl skipping through the woods, whistling happily.
The girl was followed by a big gray wolf.

Then the function should display output as :

He lived in a little house in a beautiful, green wood.
He saw a little girl skipping through the woods, whistling happily.

OR

- (b) Write a function `count_Dwords()` in Python to count the words ending with a digit in a text file "`Details.txt`". 3

Example:

If the file content is as follows :

On seat2 VIP1 will sit and

On seat1 VVIP2 will be sitting

Output will be:

Number of words ending with a digit are 4

CS Board Supplementary Paper 2023

27. (a) Write a function in Python that displays the book names having 'Y' or 'y' in their name from a text file "`Bookname.txt`". 3

Example :

If the file '`Bookname.txt`' contains the names of following books :

One Hundred Years of Solitude

The Diary of a Young Girl

On the Road

After execution, the output will be :

One Hundred Years of Solitude

The Diary of a Young Girl

OR

- (b) Write a function **RevString()** to read a textfile "Input.txt" and prints the words starting with 'O' in reverse order. The rest of the content is displayed normally. 3

Example :

If content in the text file is :

UBUNTU IS AN OPEN SOURCE OPERATING SYSTEM

Output will be :

UBUNTU IS AN NEPO SOURCE GNITAREPO SYSTEM

(words 'OPEN' and 'OPERATING' are displayed in reverse order)

CS 2023 Sample Paper

- | | | |
|-----|---|---|
| 27. | Write a method COUNTLINES() in Python to read lines from text file 'TESTFILE.TXT' and display the lines which are not starting with any vowel.

Example:

If the file content is as follows:

An apple a day keeps the doctor away.
We all pray for everyone's safety.
A marked difference will come in our country.

The COUNTLINES() function should display the output as: | 3 |
|-----|---|---|

The number of lines not starting with any vowel - 1

OR

Write a function **ETCount()** in Python, which should read each character of a text file "TESTFILE.TXT" and then count and display the count of occurrence of alphabets E and T individually (including small cases e and t too).

Example:

If the file content is as follows:

Today is a pleasant day.

It might rain today.

It is mentioned on weather sites

The **ETCount()** function should display the output as:

E or e: 6

T or t : 9

CS 2023 Sahodya Paper

27. Write a function `count_do()` to count the presence of a word 'do' in a text file 'Memo.txt'

OR

Write a function `wordcount()` which accepts the name of a text file and displays the number of words present in the file which have the same first and last letter.

OR

Write a function `RevText()` to read a text file 'input.txt' and print the text in the reverse order.

CS 2024 Main Paper

28. (A) Write a user defined function in Python named `showInLines()` which reads contents of a text file named `STORY.TXT` and displays every sentence in a separate line.

3

Assume that a sentence ends with a full stop (.), a question mark (?), or an exclamation mark (!).

For example, if the content of file `STORY.TXT` is as follows :

`Our parents told us that we must eat vegetables to be healthy. And it turns out, our parents were right! So, what else did our parents tell?`

Then the function should display the file's content as follows :

`Our parents told us that we must eat vegetables to be healthy.`

`And it turns out, our parents were right!`

`So, what else did our parents tell?`

OR

- (B) Write a function, `c_words()` in Python that separately counts and displays the number of uppercase and lowercase alphabets in a text file, `Words.txt`.

CS 2024 Supplementary Paper

28. (a) Write a method/function `COUNTWORDS()` in Python to read contents from a text file `DECODE.TXT`, to count and return the occurrence of those words, which are having 5 or more characters. 3

OR

- (b) Write a method/function `COUNTLINES()` in Python to read lines from a text file `CONTENT.TXT`, and display those lines, which have @ anywhere in the line. 3

For example :

If the content of the file is :

Had an amazing time at the concert last night with
@MusicLoversCrew.

Excited to announce the launch of our new website!

G20 @ India

The method/function should display

Had an amazing time at the concert last night with
@MusicLoversCrew

G20 @ India

CS Sample Paper 2024

- | | | |
|----|--|---|
| 28 | Write a function in Python to read a text file, <code>Alpha.txt</code> and displays those lines which begin with the word 'You'.

OR

Write a function, <code>vowelCount()</code> in Python that counts and displays the number of vowels in the text file named <code>Poem.txt</code> . | 3 |
|----|--|---|

CS Sahodva Paper 2024

28. Write a function in Python to read a text file, `sample.txt` and display those lines which begin with a vowel.

OR

Write a function, `Count()` in Python that counts and displays the number of words in the text file name `sample.txt`.

CS Main Paper 2025

29. (a) Write a Python function that displays all the lines containing the word 'vote' from a text file "Elections.txt". For example, if the file contains : 3
- In an election many people vote to choose their representative.*
The candidate getting the maximum share of votes stands elected.
Normally, one person has to vote once.
The process of voting may vary with time and region.
- Then the output should be :
In an election many people vote to choose their representative.
Normally, one person has to vote once.
- OR**
- (b) Write a Python function that displays all the words starting and ending with a vowel from a text file "Report.txt". The consecutive words should be separated by a space in the output. For example, if the file contains :
- Once there was a wise man in a village.*
He was an awesome story-teller.
He was able to keep people anchored while listening to him.
- Then the output should be :
Once a a awesome able

CS Supplementary Paper 2025

29. (a) Write a Python function that displays all the lines ending with a dot (.) from a text file "Colors.txt". For example, if the file contains : 3
- White is a mix of seven colors.*
What are these seven colors ?
VIBGYOR – violet, indigo, blue, green, orange and red.
When we mix all these colors we just get one light
which is the WHITE light.
- Then the output should be :
White is a mix of seven colors.
VIBGYOR – violet, indigo, blue, green, orange and red.
which is the WHITE light.
- (Hint : You will have to ignore trailing white spaces to check the last character)

OR

- (b) Write a function in Python to display the line which has the maximum number of vowels from a text file, "Novel.txt".

CS Sample Question Paper 2025

29.	A) Write a Python function that displays all the words containing @cmail from a text file "Emails.txt". OR B) Write a Python function that finds and displays all the words longer than 5 characters from a text file "Words.txt".	(3)
-----	--	-----

CS Sahodva Paper 2025

29.	(A) A text file data.txt has some words written in it. Write a python function CountWords() that counts and prints the number of words in each line that has length of more than 4 characters. If the contents of file is : <i>A man always wants to strive higher in his life He wants to be perfect.</i> The output should be: Line 1 - 3 words Line 2 – 1 words Line 3 – 2 words OR (B) Write a function Disp() that display all those words from the given text file that ends with the word 'at' from the text file "Create.txt".	3
-----	---	---

29. Write the definition of a python function longlines() which reads the contents of a text file 'Lines.txt' and displays those lines from the file which have at least 10 words in it.

For example, if the content of 'Lines.txt'

Once upon a time, there was a woodcutter

He lived in a little house in a beautiful, green wood.

One day, he was merrily chopping some woods.

He saw a little girl skipping through the woods, whistling happily.

The girl was followed by a big grey wolf.

The function should display the output as:

He lived in a little house in a beautiful, green wood.

He saw a little girl skipping through the woods, whistling happily.

OR

Write the definition of a python function CountT() which reads the contents of a text file named 'Lines.txt' and displays those lines from the file which have minimum two words starting with 't' or 'T'

For example, if the content of 'Lines.txt'

Once upon a time, there was a woodcutter

He lived in a little house in a beautiful, green wood.

One day, he was merrily chopping some woods.

He saw a little girl skipping through the woods, whistling happily.

The girl was followed by a big grey wolf.

The function should display the output as:

Once upon a time, there was a woodcutter

He saw a little girl skipping through the woods, whistling happily.

CS Main Paper 2026

29. Write a Python function that counts and returns the number of digits appearing in the text file 'Space.txt'.

Write a Python function that displays the words in which the lowercase letter 'e' appears at least twice in the text file 'Space.txt'

CS Sample Paper 2026

29	A. Write a Python function that displays the number of times the word "Python" appears in a text file named "Prog.txt". OR B. Write and call a Python function to read lines from a text file STORIES.TXT and display those lines which doesn't start with a vowel (A, E, I, O, U) irrespective of their case	3
----	--	---

CS Sahodva Paper 2026

29. Write a Python function that displays the number of lines in a text file named Quotes.txt that contain either the word 'programming' or 'coding' (Case sensitive)

Write and call a Python function to read lines from a text file Log.txt and display only those lines that start with a digit.

Practice Questions

1. Write a Python function that count the lines start with the word "the" in a file "xyz.txt" and display it at the end.
2. Write a Python function that extracts and displays all the words containing a hyphen ("-") from a text file "HyphenatedWords.txt", which has a three letter word before hyphen and four letter word after hyphen. For example : "for-them" is such a word.
3. Write a Python function that finds and displays all the words longer than 6 characters from a text file "Data.txt".

4. Write a function that counts no of words beginning with a capital letter from the text file RatanJi.txt

Example: If you want to Walk Fast, Walk Alone. But - if u want to Walk Far, Walk Together

Output: No of words starting with capital letter : 10

OR

Write a function that displays the line number along with no of words in it from the file Quotes.txt

Example : None can destroy iron, but its own rust can! Likewise, none can destroy a person, but their own mindset can. The only way to win is not be afraid of losing.

Output: Line Number 1: 9

Line 2: 11

Line 3: 11

5. Write a Python program to find the longest word in file "status.txt".
6. Write a function countwords() that reads a text file "story.txt" and display only unique words from the file.

Example. If the file story.txt contains the following: "he is a good boy and he is also good by behaviour"

Then the output should be a boy and also by behaviour

7. Write a function `Max_Vowels()` in Python to display the line which has the maximum number of vowels from a text file, "NOVEL.TXT".
 29. A) Write a Python function `DISPLAY()` that displays the longest palindromic word from a text file "Article.txt".

For Example if the file contains;

"Malayalam is one of the Indian language.
Arjun is driving a racecar.
Have some civic sense.
The highest level of cognitive domain is evaluation."
8. Then the output should be Malayalam.
9. Write a function to replace all spaces with # in a text file notes.txt
10. Write a function `remove ()` that accepts two file names, and copies all lines that do not start with a lowercase letter from first file to second one.
